

SELF-POLISHING

HIGH LUX is a colourless solvent-based varnish with elevated polishing properties. It revises and gives shine to marble, granite and stone surfaces and is especially suitable to chemically polish substrates where mechanical polishing is not possible. The product gives origin to a thin layer that acts as protection and does not yellow over time.

FEATURES
solvent based

COLOUR
transparent

TYPE
fluid

CONTAINER
ADR

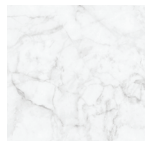

Apply on a dry, clean and dust free surface. It is possible to apply the product with a cloth or a paint roller. Let it dry for at least 5 minutes and the surface will be shiny and brilliant without needing any further treatments. Do not dilute. With one liter of product it is possible to treat around 10 / 20 sqm of surface. Do not use on: linoleum, plastic, laminated supports and on floors or on walkable surfaces.
